Dilating the pupils to perform a dilated fundus exam is recommended during your comprehensive eye examination. Dilation provides the Doctor a better view of the internal structures of the eye. Dilation can blur your vision and make you sensitive to light for several hours. You should not operate heavy equipment or drive a vehicle until you feel safe to accomplish these tasks. Any lasting affects such as redness or eye pain should be reported as soon as possible. We routinely use photo imaging to document the health of the internal eye regardless of dilation. Please sign below with your preference.

I **ACCEPT** Dilation and Imaging

I **DECLINE** Dilation and accept Imaging only
